

Massivit 3D Printing Technologies Ltd.
www.massivit3d.com (TASE: MSVT) is the leading provider of large-scale 3D printing systems, serving a range of industries including Automotive, Marine, Rail and Scenic Fabrication.

Our Technology

Massivit's disruptive, interdisciplinary solutions – comprising of hardware, software, and consumables – have been adopted across 40 countries to date. Massivit offers two product lines: Gel Dispensing Printing (GDP) and Cast In Motion (CIM). GDP enables ultra-fast production of large-scale end parts, and functional prototypes – at up to 30 times the speed of existing 3D printers. The unique build volume of Massivit's GDP systems facilitates parts up to 57 x 44 x 70" / 1450 x 1110 x 1800mm). The CIM product line enables industrial molds, master tools, mandrels, jigs and fixtures to be directly printed 80% faster than traditional methods.

The Company

The company's vision is to transform manufacturing of large parts from traditional processes to ultra-fast, digital fabrication using industrial-grade materials. Massivit employs 170 people world-wide and was listed on the Tel Aviv Stock Exchange in February 2021. It is headquartered outside of Tel Aviv, Israel with regional demonstration centers in the USA and Europe, along with an established global sales and distribution network. To date, the company has installed over 200 machines globally.

The Future

In H1 2022, Massivit launched the Massivit 10000 additive, manufacturing system – designed to transform tooling processes for composite materials manufacturing. This market is a rapidly-growing, multi billion-dollar market, serving multiple industries.

Founders

Massivit was founded in 2013 by a team of experts led by Gershon Miller, an industry pioneer who previously established Scitex Vision (Idanit) which was subsequently acquired by HP and Stratasys.

Shareholders

Massivit is listed on the Tel Aviv Stock Exchange. Its key, strategic shareholders include Stratasys, Yaskawa and financial groups.

Management

The company's CEO is Erez Zimmerman, a former member of Scitex, Stratasys and EFI. The Chairman of the Board is Yaron Yechezkel.
