

Innodraw Laser-Based, Measuring and CAD Drawing System

1. InnoDraw does not generate point cloud files. Instead, it produces fully detailed 2D and 3D CAD drawings in real-time through advanced laser scanning technology. At the end of the scanning process, a complete 2D and 3D CAD drawing is immediately ready for use.
2. InnoDraw is 99.9% accurate. Beyond its inherent precision, the software features an “Accuracy Verification” function, ensuring absolute accuracy for every measurement and drawing.
3. InnoDraw utilizes affordable Leica laser devices, such as the hand-held Leica Disto D2, priced at just \$160. This device is sufficient for most home improvement measuring tasks, making high-precision technology accessible.
4. InnoDraw drawing files are significantly smaller in size compared to bulky point cloud files, ensuring easier storage and faster processing.
5. InnoDraw automatically converts its CAD drawings into leading software programs used by home improvement professionals, architects, and interior designers, including AutoCAD, Revit, SketchUp, 2020, ProKitchen, Cabinet Vision, and more.
6. There are no charges for creating CAD drawings with InnoDraw, making it a cost-effective solution.
7. InnoDraw eliminates the need for tedious, additional drawing work in the office, streamlining workflows and increasing efficiency.
8. By removing the extra manual drawing work in the office, InnoDraw also eliminates human errors and mistakes, ensuring higher accuracy and consistency.
9. InnoDraw software is tailored with specific features designed for Home Improvement applications, offering unparalleled functionality for professionals in this field.
10. InnoDraw operates on a “per-use” payment model, with no monthly flat fees, allowing users to pay only when the service is utilized.
11. There are no storage charges for drawings, and InnoDraw imposes no limitations on the number or size of the files, providing users with complete flexibility.
12. InnoDraw offers an excellent opportunity for service providers to diversify and expand their businesses into new market segments, leveraging its advanced technology.
13. Service providers who have adopted InnoDraw have experienced the significant advantages of the system, enabling them to successfully enter and grow in new and varied market segments.
