ISRAEL EXPORT INSTITUTE

# THE ISRAEL EXPORT INSTITUTE

**The Israel Export Institute** (IEI), backed by member companies, private sector partners, and the Government of Israel, drives global business opportunities for Israeli exporters. By offering a broad range of export-oriented services for Israeli firms and complementary support for international organizations, the IEI fosters successful joint ventures, strategic alliances, and trade partnerships worldwide.

The **Health & Life Science Sector** is the leading hub for connecting Israel's 1,600+ life science companies with global partners to deliver cutting-edge solutions that address today's most pressing healthcare challenges.

## Innovation at Scale

By 2025, Israel boasts 1,800+ active life science companies, growing steadily from just 200 in the 1990s

**40%**

already generating revenue

**40+**

new startups per year

**For more information**, please visit the Israel Export Institute's website:  
<https://export.gov.il/en/>

Or email Director of Health & Life Science, Karin Mor:  
[karinkm@export.gov.il](mailto:karinkm@export.gov.il)

# THE FOREIGN TRADE ADMINISTRATION

**The Foreign Trade Administration** at the Ministry of Economy and Industry is responsible for managing and directing the international trade policy of the State of Israel.

The Administration's main activities include promoting trade and exports, initiating and maintaining trade agreements, attracting and facilitating foreign investments, and creating strategic cooperation with foreign companies.

Together with the Administration's team in Israel, we operate a network of 55 offices, including 41 Economic and Commercial Missions worldwide, which serve as the operational arm of the Ministry in the global markets.

Israel's Economic and Trade Missions are at the forefront of the Israeli government's efforts to boost our industries in foreign markets. Our network of highly experienced economic representatives provides a wide range of services to Israeli companies and to the international business community.

### Real-Time MR-guided Margin Assessment in Breast-Conserving Surgery

ClearCut developed first-to-market compact MRI system for real time intraoperative margin assessment of excised tissue during breast-conserving cancer surgery. Today, about 25% of patients undergoing this procedure require repeat surgeries because the surgeon has no indication during the procedure whether all margins are clear. Instead, he/she needs to send the excised tissue specimen for cytopathology analysis and wait for the results.

The ClearCut system is mobile and fully shielded, with no special facility requirements. It is placed in the OR and provides real-time objective information in the form of an intuitive topographic display does not require any expert for interpretation.

### Point-of-care screening device for early detection of colorectal cancer risk.

Jubaan develops Gixam - a unique point-of-care screening device for early detection of colorectal adenoma, a precursor of colorectal cancer. Gixam works by capturing tongue images of the patient and, using deep-learning algorithms, provides an immediate reply whether the patient has an elevated risk of having adenoma.

There is no other screening method for detection of early-stage adenoma. The device is not yet approved. We are currently about to start the US pivotal study, aiming at FDA approval by Q4/26.

**One of the leading medical centers in Israel from the Clalit Group is looking for collaborations in the areas of: innovation, research, exchange of medical delegations and is open to proposals.**

Meir Medical Center, located in the heart of Kfar Saba, stands among Israel's leading hospitals and is a proud member of Clalit Health Services, the country's largest and most advanced healthcare organization. With 800 beds, 4,500 dedicated staff members, and over 460,000 outpatient visits annually, Meir provides care to nearly one million residents - a vibrant, diverse mosaic that represents the full spectrum of Israeli society.

Our centers of excellence span orthopedics and sports medicine, oncology, hematology, ophthalmology, cardiology, pulmonology, pediatrics, and women's health. As a university hospital affiliated with Tel Aviv University, we integrate outstanding clinical care with cutting-edge research and the training of the next generation of physicians.

## Contactless remote patient monitoring that benefits healthcare professionals and patients.

At Neteera, we're on a mission to revolutionize healthcare through precision sensing technology. By harnessing the power of data and innovation, we empower patients and providers to achieve better outcomes. Neteera's FDA-cleared and CE MDR-certified solution has the ability to monitor vital signs and activity parameters, using a contactless sensor.

The platform provides an interactive gateway for patient monitoring to assist in optimized care. We enable clinicians to: Gain real-time insights into patient health and treatment efficacy with our precision sensing solutions. See beyond the surface and detect early warning signs with our advanced technology. Seamlessly integrate into existing clinical workflows to analyze data, thereby improving operations and enhance patient care delivery. Neteera's sensing platform eliminates the need for device manipulation, removal of clothing, and caregiver presence. Neteera's technology is a maintenance-free, radar-based solution that is non-intrusive as it does not rely on images.

**Tailorpath is an AI-powered platform that delivers personalized, accessible care plans for older adults and people with disabilities, supporting independence, rehabilitation, and proactive care.**

Tailorpath is a digital assistant that provides personalized care plans for older adults through a user-friendly and cognitively accessible interface. It supports functional independence, emotional well-being, and cognitive health using validated tools like WHODAS 2.0 and Goal Attainment Scaling. Tailorpath stands out by combining individualized intervention planning, built-in risk management, automated monitoring, and accessible design.

It enables older adults to manage daily tasks independently while giving care providers real-time data and structured reports. This solution reduces costs, enhances care quality, and supports proactive aging-in-place strategies, making it ideal for insurers and senior care systems seeking scalable, human-centered solutions.

**Tempramed developed the first IP-backed protective solution for temperature sensitive injectable medications.**

Everyday pharmaceuticals are injected by millions of patients worldwide. However improper storage during use degrades their potency and puts patients' health at risk. TempraMed's patented unique space-grade technology fosters patient well-being by protecting patients from damaged medications. TempraMed's new VIVI Smart Cap revolutionizes insulin management with precision technology.

The innovative device records the time of the last insulin injection and syncs and logs this data with a mobile app. Combined with the VIVI Cap insulin temperature shield, it provides a comprehensive, cutting-edge solution for safeguarding and managing insulin effectively.

- Scientifically proven
- FDA/CE registered · Protects 24/7/365 - reusable for years!
- Fits insulin and weight loss pens
