RHINOCARE

Nasal Congestion Improvement
Homecare Medical Device

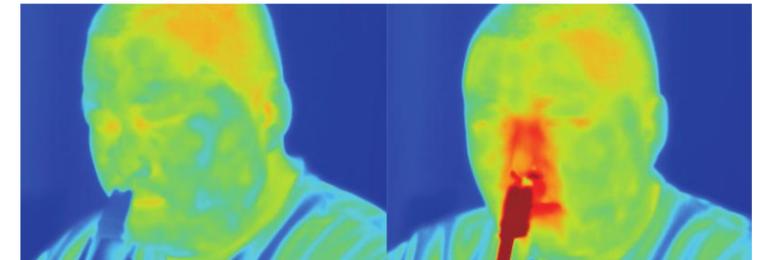

This product is medical device.

MAIN MECHANISM

Using only Pure Water, No harmful side effects

RhinoCare® uses only 100% saturated water vapor to treat nasal congestion.

Before Treatment

In 5 minutes

Hyperthermia Treatment

Delivers 43°C (110°F) saturated steam to safely reduce inflammation, improve blood circulation, and relieve nasal congestion — without harming healthy tissue.

Jet Stream

Our unique and core technology utilizes a key system that sprays high-pressure air combined with saturated water vapor at 43°C. This advanced system effectively overcomes anatomical resistance in the nasal passages, allowing it to reach and treat the inflamed sinus areas.

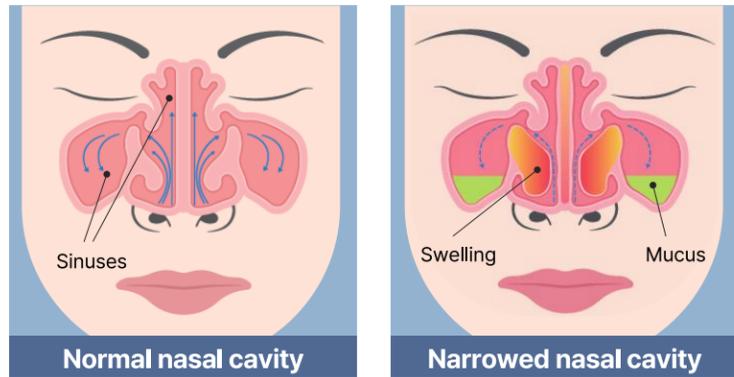

RHINOCARE

Experience a refreshing relief with RhinoCare®

The Novel, the First, the Only Homecare Device For Nasal Congestion improvement

Using RhinoCare Korea Inc.'s internationally patented technology, RhinoCare® delivers 43°C steam deeply into the nasal passages to treat the nasal congestion caused by rhinitis, sinusitis, cold, and flu.

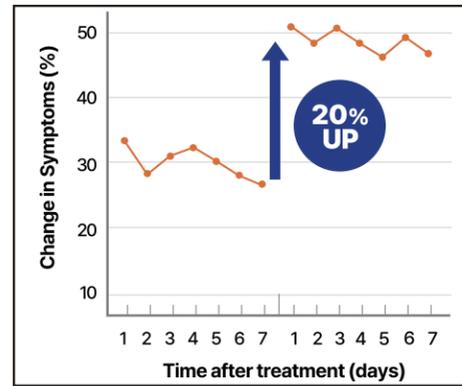

What causes nasal congestion?

There are air chambers in the nasal cavity, which are called sinuses. When the stimuli irritate tissues, the mucous membrane in the nose swells, filling the cavity with mucus. This blockage results in nasal congestion and makes it difficult for the patient to breathe.

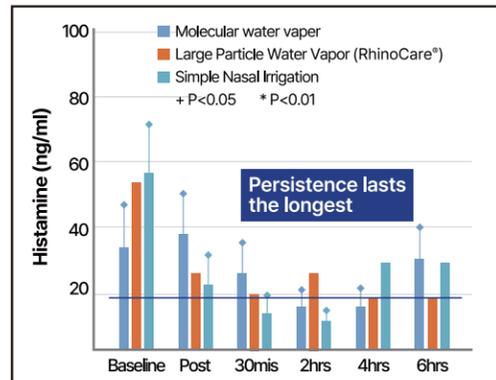

CLINICAL TRIALS

on 990 patients from 13 institutions in 6 countries

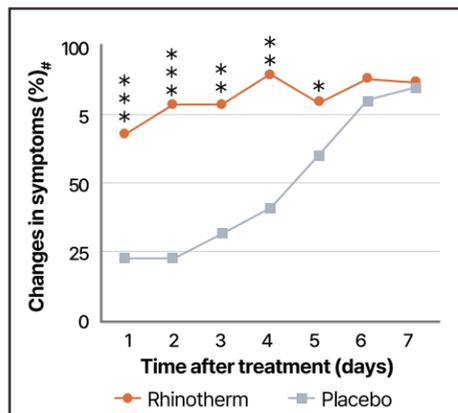

1 Rhinocare improved nasal congestion symptoms in **67%** of patients with allergic rhinitis.

2 Rhinocare has been shown to reduce inflammatory mediators for **over 6 hours** in patients with chronic rhinitis, demonstrating a **lasting effect**.

3 Rhinocare improved cold symptoms in **81%** of users and nasal congestion in **74%** of users

SLEEP DISORDERS IMPROVEMENT

Drug-Free Solution for Sleep Disorders

Relieve Nasal Congestion

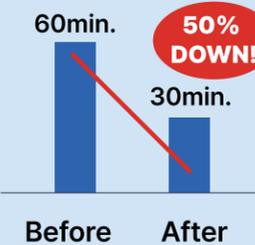

Just 15 minutes before bedtime

Clinically Verified Sleep Improvement

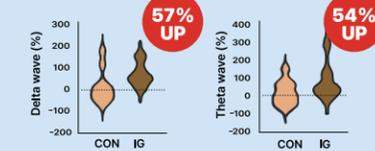

(2025, Research Institute of Sports and Industry Science, Hanseo University)
